

ABOUT ME

Full-stack developer with real-world experience building and deploying scalable web applications using JavaScript, React, Next.js, Supabase, and Node.js. Proven ability to design full-featured systems with secure auth, AI integrations, and database-driven logic. Strong foundation in software engineering, Agile workflows, and end-to-end product development. Currently seeking a junior developer role where I can contribute immediately to impactful software teams.

WORK EXPERIENCE

Software Developer <i>Head First, Halifax, Canada</i>	April 2024 – Present
<ul style="list-style-type: none">Building MVP features for a concussion recovery platform using React, Supabase, and Tailwind.Integrated key components like symptom tracking, user progress dashboards, and data visualizations.Worked with the UX/UI designer to align development with finalized wireframes for seamless user experience.Set up API integrations for accommodation platforms and third-party booking systems.Conducted internal testing, documented progress, and iterated based on team feedback.
